

Dixie Grand

The following sequences were used on a
CTOZ (i.e. Caller Training On Zoom)
session on February 12, 2022

The first three are different ways to set up the most common way of using Dixie Grand, i.e. from a double pass thru formation with paired couple on the inside (i.e. leaders) and unpaired corners on the outside (i.e. Trailers).

The next one is from a Single File Promenade setup. This was probably one of the first ways Dixie Grand was done. There are many ways to set this up, and variations where the Women do the U Turn Back

Here is an easy to remember module to set up DxG from Partner Lines.

The simplest way to add DxG for either a sight caller or module caller is to do the following when you are in a corner box. The one after that is almost the same but flows very nicely from a corner line.

One done from a completed double pass thru formation, is easily set up when you are in a formation where the centers can Pass Thru to the corner.
